ACL 4000 Flare Stack Ignitor

Model: ACL 4000

The **ACL 4000 Flare Stack Ignitor** is a safe and cost effective means of lighting off all types of flare stacks. It does not require any source of power.

The ignitor consists of a piezo ignitor, spark rod, a fuel/air mixer and flame arrestor. To light the stack, simply open the fuel gas valve and allow shot tube to fill with air/fuel mixture then press the ignition button. The flame ignites at the bottom and travels up the stack through a 2" line. Ideal for flare systems with a continuous pilot or manually operated flare stacks.

Aluminum construction eliminates rusting and corrosion

Venturi barrel for increased performance

High pressure atmospheric injector

Piezo ignition

No power required

Removable high temperature spark plug

Flame arrestor protects operator from flashbacks

Easy installation
